For our Business Unit Textile Identification based in Lamone, Switzerland, we are searching the following (new) position

Field Application Engineer

KEY RESPONSIBILITIES AND DUTIES

The Field Application Engineer (or sales engineer) will be responsible for the pre-sale and post-sale activity of Datamars' textile RFID reading systems. He/she is responsible for defining, installing and maintaining Datamars RFID reading systems in customer laundries. He/she is also responsible for adapting (when needed) Datamars reading systems to the specific customer requests. The Field Application Engineer manages the whole process, from understanding the customer needs to defining the budget and implementing the modifications. The activity is held in close collaboration with the sales team and the product development team: it requires both a deep technical understanding of RFID systems and a sound knowledge of customer management. The person will travel mainly in Europe on a regular basis (approx. 35% of his/her time). He/she will report to the Director Product & Services TID.

REQUIREMENTS

- BSc or MSc in electronics or equivalent
- 5 years of working experience within a technical position
- Extensive and hands-on experience with electronic systems
- Experience with on-site customer support
- Background in RFID is considered a strong plus
- Familiar with customer/application engineering under strong budget/cost control
- Proficient in English (level C1 minimum) as well as Italian and/or German, any other language (French or Spanish) is considered a plus
