ENGINEERING SPECIALIST

KEY RESPONSIBILITIES

The candidate will lead and manage Manufacturing and Quality engineering activities including products and processes development, production, testing and quality. Implements and maintains overall engineering objectives and initiatives to improve efficiency. Leads and develops the engineering team. Oversees a robust project management process and delivery timelines to keep projects on schedule and on budget. Provides input to strategic decisions that affect the functional area of responsibility. Capable of resolving escalated issues arising from operations and requiring coordination with other departments. Implement and maintain all applicable QSR / GMP requirements.

MAIN DUTIES

Under the guidance of the Plant Manager, the Engineering Specialist is responsible for leading the engineering activities focused on product and process design, development, testing and continuous improvements. The ideal candidate will be hands on, with leadership skills and project management experience. The position is also responsible for supervising a small team as direct reports.

REQUIREMENTS

Qualifications:

- Bachelor degree in engineering or equivalent with 5 years of engineering experience within electronic, medical device or biotech manufacturing companies; experience on an international level and business merge and integration will be considered as a strong plus
- Analytical and mathematical mindset, capable of evaluating and solving various complex problems
- Leadership skills necessary to manage and develop a small team
- Organizational competencies and project management skills to keep projects, processes, and the engineering issues on track
- Self-motivated attitude with the ability to multitask and thrive in a timeline-driven environment
- Interpersonal communication skills with expertise in distilling complicated topics to a broader audience
- Ability to work individually and as part of a team
- Certification in 6 Sigma, 5s or other Lean Manufacturing techniques will be considered and important advantage
- Fluent in English and Spanish

Skills and Experience

- Experience in mechanical and robotic equipment implementation and management
- Ability to direct multiple projects simultaneously and set priorities to meet deadlines;
- Familiarity with computer techniques, file navigation, data collection methods, etc.
- Strong problem-solving skills, and the ability to work under pressure and tight deadlines.
- Exceptional written, oral and presentation communication skills
- Self-motivated team player with ability to influence others and work within cross-functional teams to make critical decisions

DATA MARS

Responsibilities:

- Design, acquire, install and commission mechanical/electrical equipment, systems, and parts to support manufacturing
- Equipment maintenance and calibration
- Partner with operations departments to identify problems, conduct Root Cause Analysis, analyze requirements to come up with optimal resolutions for challenging equipment issues
- Design Assurance Quality Planning (i.e. new product development and design transfer)
- Actively participate in the design control process: planning, design input, design output, design review, design verification, design validation, design changes, and design history file maintenance
- Manage process validations in conformity with Datamars QMS
- Ensure that the production and/or service of products are maintained at the rate and quality levels assigned as required by applicable KPI's
- Provide input requirements and direction for manufacturing tooling and equipment
- Direct and oversee successful integration of process automation activities
- Oversee equipment and process testing and conduct analytical and product performance testing
- Maintain compliance with all Quality Systems requirements. Fully adhere to all applicable ISO / GMP regulations, international guidelines and company policies at all times

WE OFFER

- Exposure to an international environment
- Dynamic work environment
- Competitive remuneration

Does this position meet your interest and do you have the requested skills? Then please send your complete application with motivation letter, CV, references to Spanish-recruiting@datamars.com and mention your name and "Engineering Specialist" in the subject line.

Applications that don't fulfil the requirements will not be considered for the selection.
