

Warehouse Manager

- **Deliver an exceptional optimised National & Global distribution network**
- **Cultivate a culture of accountability, unified team spirit, continuous improvement**
- **Instigate change & deliver to a number of projects including a warehouse extension**

Leadership – People - Process – Technology – Projects – an all-encompassing, challenging opportunity to deliver world class warehousing operations.

Based at our Auckland operations, our largest site across Australasia, you'll play a significant role assessing our current warehouse operations, identifying areas for improvements, educating, training and cross skilling the team (of approx. 20), building a culture of accountability, reviewing and implementing processes and working alongside and understanding key stakeholder business deliverables, with a view to ultimately increasing the performance to deliver exceptional customer service and DIFOT results.

A snapshot of where you'll be expected to add value includes:

- Leading the team through coaching, cross training, up skilling to achieve business plan objectives through the effective management of inwards goods, warehousing, stock transfer and despatch functions
- Cultivating a successful team who take accountability for delivering outstanding results
- Implementing key performance indicators & visibility of performance
- Implementing simplified and efficient SOP's, work instructions & documentation
- Delivering an optimised National & Global distribution network
- Advocating Health & Safety – building a safety culture & implementing improvements
- Collaborating with various internal teams including Planning to achieve the best customer service levels whilst maintaining minimum stock levels
- Provide leadership to drive and support continual improvement in DIFOT performance
- Assess and deliver a robust stock take process and improve inventory control
- Assisting in the planning and execution of a warehouse extension project onsite
- Key role in supporting the business with the implementation of SAP and roll out of RFID scanners

Tactical in your thinking, you'll have a proven background in managing efficient and effective warehousing functions within a global, manufacturing environment combined with tertiary qualifications in logistics or operations management. Experience in change management and business improvement will be imperative to your success, as will exceptional leadership and coaching qualities alongside setting and managing performance. Strong data analysis and reporting and knowledge of MS Office, JDE or SAP is highly advantageous.

You'll work alongside a highly dedicated, respected and supportive Supply Chain & Procurement Manager who will coach and guide you and provide confidence in your abilities to deliver. On offer is a market competitive base salary, kiwi saver contributions and car parking.

All applicants will need to have a current work visa for New Zealand.
