

Mobile Software Developer - Auckland

- **Global business - Pioneering electronic technologies - Agri-tech sector**
- **Improve the intelligence & value to our customers developing mobile apps**
- **Provide engineering support to existing & new product systems**

Drive app design, provide leading insights, program in Xamarin, document, debug, and test, deploy, support & sustain mobile applications.

*We are global leaders in delivering integrated solutions in **livestock management, animal health delivery, pet identification and reunification and textile identification**. Our people, our legacy strength in technology, our closeness to customers and our quality products helps drive our success as we work towards an exciting, sustainable future.*

With innovation at our core, it is the ideas and mind-set of our people that enable our business to deliver exceptional outcomes and quality products to our global customer community. As an active participant in our software development engineering team and wider R&D team, you'll enjoy seeing the outcome of your work, which will have a significant and visible impact in our business and used on farms around the world.

Accountabilities will include:

- Software development of mobile applications in Xamarin
- All aspects of the agile software development lifecycle
- Software requirement specifications and design documentation
- Defining project objectives to contribute to the development of comprehensive designs
- Testing
- Development and delivery of robust ingenuity products
- Communicating with global internal channels across different time zones

Technology experience:

- Development of mobile apps (Android or iPhone)
- Proficiency in Xamarin development, React Native, or Flutter
- Supporting mobile web-service driven apps, interface and libraries
- Unit testing
- Architectural design, automated testing, continuous integration and build management

For us and for new talent joining our business, it's an exciting time to play a key role in making an impact across our sector with a range of new and advanced technologies. You'll work alongside a collaborative SaaS and Mobile Lead in a supportive and solution focused team where you will be given the room to use your proven expertise to get on and deliver. A competitive base salary plus Kiwisaver, car parking and flexible working hours are on offer.

We will be actively recruiting for this position the week of 13th January. You can either express an interest via an online application or phone Mel Pantelides, Recruitment Lead on 09 574 8120 for a chat in January.

All applicants will require a valid working visa for New Zealand.

Please send your application directly to Mel Pantelides, Recruitment Lead –
