

Supply Planner

- Global Business leading technology advancements in the agriculture sector
- Multifaceted role with array of supply chain activities - transactional & projects
- Improve supply planning processes & support cross functional capabilities

Lead the supply planning process – interact across all internal teams local & globally – initiate and drive continuous improvement

If you are an experienced Supply Planner with strong commercial awareness and pride yourself on taking ownership to drive and deliver outcomes, this role will definitely keep you challenged and provide scope for career growth and development across supply chain and planning.

Based at our Auckland Datamars operations, our largest site across Australasia with a team of approximately 300, you'll be an integral member of our Planning Team and be tasked with forming exceptional relationships across the business, enabling you to influence and negotiate beneficial outcomes in line with business objectives.

Core day to day accountabilities include executing the process of planning products from raw material to our customers and to drive and improve the supply planning process whilst identifying supply constraints between sales demands against supply capabilities across the business operations. Key to your role will be leading the process of reviewing supply planning against demand forecast, leading S&OP meetings, maintaining the strict process for defining the master schedule, monitoring production performance to plan, initiating root cause analysis for inventory discrepancies and keeping relevant stakeholders updated.

Development, monitoring and reporting of KPI's plus a focus on continuous improvement will be areas you personally pride yourself in adding value as is looking after your own safety and others. Business or Supply Chain Management Degree of APICS would be preferable as is in-depth understanding of all aspects across the S&OP. Knowledge in SAP-B1 is preferable, proficiency in MS Excel and exposure to integrated business planning for manufacture of electronic components, plastic moulding, metal moulding, packaging, printing & labels would be beneficial.

Recognised as a results orientated, strategic thinker, team player and someone who can influence others to achieve the end goals, you'll work alongside a highly dedicated, respected and supportive Supply Chain & Procurement Manager who will coach and guide you and provide confidence in your abilities to deliver. On offer is a market competitive base salary, Kiwisaver contributions, car parking and flexible work hours. If we've peaked your interest, please apply online and we look forward to exploring your potential.

To apply for this position, you will need a current work visa for New Zealand.

Please send your CV directly to Mel Pantelides, Recruitment Lead in Auckland, NZ – melanie.pantelides@datamars.com
